Safe Water System: Preventing Disease

USAID grantee (CARE) staff in Aceh demonstrate a home water chlorination kit pioneered by the CDC. USAID provided over 70,000 kits to Aceh.

An internally displaced person practices mixing the safe water system solution in a bucket of water. One capful purifies 20 liters of water.

USAID
FROM THE AMERICAN PEOPLE

USAID relief supplies delivered through the U.S. military for Aceh Tsunami aid recipients.

Tsunami Recovery and Reconstruction

Request: \$950 million

- \$339 million for infrastructure reconstruction (roads, schools, and water distribution systems)
- \$168 million to help victims transition back to their communities, (food aid, shelter, housing reconstruction, education, and programs that help victims recover and get back to work)

• \$35 million for disaster early warning systems:

- improve the international and U.S. tsunami early warning system
- enhance tsunami early warning and disaster mitigation in the affected countries

• \$62 million for good governance and technical assistance for planning reconstruction activities

• \$346 million to replenish costs incurred by USAID and DoD for provision of immediate relief
